EDUCATION

University of Florida May 2028

Bachelor of Science in Computer Science, Minor in Business GPA: 3.77

- **Relevant Coursework**: Data Structures & Algorithms, Operating Systems, Software Engineering, Computer Organization, Discrete Math, Linear Algebra, Engineering Statistics, Financial Accounting
- **Awards/Certificates**: Certiport IT Java Specialist, Nvidia Fundamentals of Deep Learning, Dean's List (2024-2026)

EXPERIENCE

Co-Founder & Chief Technology Officer Dec 2025 – Present

BeachLens *Tampa, FL*

- Launched a React Native mobile app for beach safety information, reaching **30,000+** users on iOS/Android.
- Personalized the beach experience with a beach-scores model using vector-similarity search and collaborative filtering, powered by a serverless ETL pipeline refreshing forecasts across **300+** beaches in real time.
- Built a PyTorch computer-vision model to forecast beach crowd levels from satellite imagery and traffic data.

Software Engineering Intern May 2026 – Aug 2026

Vobile Group *Santa Clara, CA*

- Saved **$500K** by migrating an internal media-claims platform off legacy tooling for major studio clients (Sony, Paramount, Warner Bros.), enforcing code quality via GitHub Actions CI/CD with Jest.
- Architected an AIMD gateway that adaptively throttles Conductor kickoffs, preventing Redis backpressure across **2.5M+** daily workflows using Elasticsearch and Prometheus for health monitoring.
- Diagnosed and fixed OOM crashes in Celery and RabbitMQ, restoring throughput from 2-3 msg/s to **700+** msg/s.

Software Engineering Intern Jan 2026 – May 2026

Vobile Group *Santa Clara, CA*

- Reduced data size **15%** by migrating JSON serialization to binary MessagePack in Django and RabbitMQ.
- Engineered a YouTube crawler that expands copyright-match discovery via related-video traversal, surfacing **300k+** additional flagged records/week, deployed via Conductor on Kubernetes using Helm and Flux GitOps.
- Automated TypeScript batching and compression that cut S3 storage costs and Conductor payload size, saving **$15,000**/month across 1,000+ daily assets.

PROJECTS

Mii-nagement | *Python, TypeScript, Django, Godot, SQLite, Vultr, ACP, Jev, Docker, GitHub Actions* Oct 2026

- Built the AI backend for a Tomodachi Life-style game that turns AI coding agents into trackable characters.
- Cut developer time spent monitoring agents **40%** by delegating decisions to Jev and running parallel agentic workflows over the Agent Client Protocol, validated by building Mii-nagement with itself.

CaseForwardAI | *TypeScript, React, Next, MongoDB, Gemini, Cloudflare, Figma* Jan 2026

- Won **1st Place** at SwampHacks XI (100+ projects), building a multi-agent legal platform with Next.js and MongoDB that automates document intake and analysis.
- Slashed manual processing **80%** by architecting a Gemini-powered orchestrator that runs specialist agents in parallel, synthesizing their findings while storing case files in Cloudflare R2.

LEADERSHIP

Webmaster Aug 2024 – Present

Society of Asian Scientists and Engineers *Gainesville, FL*

- Developed an AI Advisor, a RAG-based LLM chatbot, with React, contributing across Go microservices via gRPC.
- Led a **30**-member Software Team across 3 sub-teams using Scrum, running Git, React, and REST API workshops.
- Modernized the SASE website for **2,000+** members using Vinxi, TanStack, and the T3 stack deployed via Vercel, adding features, fixing bugs, and leading peer code review under Agile.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Go, C, C++, SQL, Java, HTML/CSS
Frameworks/Libraries: React, NextJs, NodeJs, FastAPI, Django, Pandas, NumPy, Matplotlib
Infrastructure & Tools: AWS (EKS, S3, EC2, ECR), Docker, Kubernetes, Helm, Lens, Flux GitOps, CI/CD, RabbitMQ, Redis, Git, Linux, Figma, Postman, Cursor/Claude Code, Linear/Jira, Elasticsearch, Grafana/Prometheus
